## Colossal Campus Placements at CT Group of Institutions

**"108 leading corporates visited CT Group of institutions for 2011-2012 batch"**

S. Charanjit Singh Channi  
Chairman  
CT Group of Institutions

Training and Placement is the key area in an institution which provides placement & career opportunities to the students. An institution continuously strives to establish linkages with the various Industries, organizations and institutions for placement of

the students.

CT Institutions a prestigious group of North India is committed to ensure a bright and prosperous career for their students by providing them ample career avenues and opportunities for placements in the leading companies across all the domains. Keeping in line with the trend, many leading companies across various sectors which visited CT Institutions extended job offers to the students with very smart packages.

During 2011-12 sessions 108 companies visited CT group and 828 offers were rolled out by these companies.

TCS, Axis Bank, HCL Infosystems, Gabriel India Ltd, CMC Ltd, AZZ Group, Nerolac Paints, Lupin Pharma, Aon Hewitt and RBS (Royal Bank of Scotland) are some leading giants that visited CT Institutions. The maximum package for B.Tech & MCA students was offered Rs. 3.75lac per annum and for Management students it was Rs. 4.25lac per annum.

S. Charanjit Singh Channi, Chairman of CT Group extended his felicitations to all the selected students and their parents. He stressed upon the fact that CT Institutions, has trained the students with ample industry exposure and practical knowledge, hence shining in the corporate world would not be a difficult task for

Students at campus placement drive

them. He reiterated his commitment to provide more such job opportunities not only to the CT students but to all the students pursuing their

higher studies in various institutes of their region taking it as a part of their corporate social responsibilities.

STREAM	NUMBER OF PLACEMENTS

## CT Group again holding the fort with A Grade by NAAC CT College of Education Accredited with grade "A" by NAAC

It is a matter of great pride for CT Group of Institutions, that CT College of Education is accepted with grade "A" by NAAC peer Team. NAAC stands for National Assessment and Accreditation Council, being an autonomous body of UGC. The Institutions for this accreditation are evaluated on parameters from Academics to Infrastructure. The credit of this fruitful venture goes to S. Charanjit Singh Channi, Chairman

CT Educational Society who inspired the Team of faculty with his visionary approach

Principal of the College Dr. Inderdev Singh Nandra & faculty too left no stone unturned in achieving the mark of excellence. Feeling elated on this achievement S.Charanjeet Singh, Chairman CT Group of Institutions said, "The credit goes to the diligent faculty of CT Group who put the best part of the efforts. The faculty has

shown a good sense of responsibility whenever the need of their support was felt. For creating an affable atmosphere in the premises of the college all the faculty members are admirable. CT Group has always endeavored to provide the best education to the society. So this journey would move on. He further added that now the onus will be more on CT Group to lead in quality education"

**THOUGHT FOR THE MONTH**

"A moment comes, which comes but rarely in history, when we step out from the old to the new...India discovers herself again."

- J.L.Nehru

**Editorial****Journey after Independence**

It has been sixty years since our motherland broke the shackles and unfettered herself from colonial presence. Today things have changed. India is considered to be an emerging superpower of the world. Be it technology, economy or any other area we have incanted the knack to master all. With the GDP growth touching whopping levels of 8% per annum and a booming sexch the economy seems to be growing at an unprecedented rate. There has been considerable development on the social front as well. The literacy rate has improved significantly with almost three-fourth of the population considered literate now. Health facilities have improved both in terms of infrastructure as well as in terms of skilled personnel. Life expectancy at birth is almost 82 years now. Unemployment levels have gone down and thus

have the poverty level. Various government schemes have helped to create a pool of opportunities for the rural people and have also motivated them to take part in the development process of the country. In the field of science and technology as well as in the industrial arena we have attained great heights. Indian space research is already on the verge of entering an elite group with "Chandrayaan", India's lunar mission already on the cards. The Indian business houses have started to rule the world. With the growing spate of international acquisitions by India's biz houses, the world seems to be feeling the strength of Indian industry. The Indian IT industry has already been able to reverse the trend of outsourcing swinging it in the country's favour. The supercomputer 'Eka' built indigenously in India testifies to India's growing technical skill. The modes of communications have improved to a respectable level in the last couple of decades. We have kissed the peak of glory in almost every area. Well, apart from all these developments there seems to be something else that deserves special mention. The greatest feat of all that has been achieved all these years is change in outlook of the average Indian. Today we can proudly say that our country provides us opportunities to pursue what we want which was indeed a rare spectacle some 20 years back. Today India's opinion is of considerable significance on all the burning issues that the world faces today. India is looked upon with reverence by the arrogant west and we are a source of inspiration for the developing world. Our achievements have been exemplary over the last sixty years, but there still seems to be long way to go.

We cannot afford to rest, we have attained extraordinary growth but the real test before us is to sustain this boom. The government has been formulating several policies but it is the responsibility of every citizen to work and co-operate in the proper execution of the policies so that we can continue with our stupendous success story and become a superpower within the next fifteen years.

**Importance of Discipline in Life and Sports**

Discipline is the ability for an individual to have self restraint and to behave and practice in a strict controlled manner.

In day to day life, whilst discipline is an action, it starts with a decision in the mind and can therefore be positively encouraged and influenced. In Sports, and Player or Athlete needs to be in Disciplined in the technical, tactical, mental, physical as well as life style areas of development.

Discipline means abiding by, or adhering to, certain rules or norms of social life. Discipline is what a person imposes on himself taking it as his duty to God, to Society, or to some other institution. It remains a strict control over an individual's right and privilege, which if allowed swelling uncurbed and unregulated may result in disorder and anarchy in social and political life of country.

Discipline is vital to successful life without discipline army is reduced to disordered mob, democracy degenerates to monocracy and social life becomes chaotic and anarchical. Mahatma Gandhi, the father of nation has greatly stressed the need for discipline among people, if all citizens observe certain moral restrictions on themselves, the social and political life on the country will improve.

Discipline plays vital role in sports (on field and too off field). Discipline is revealed by the body language, habits, and concentration towards the game by the player. Disciplined players are well behaved, good spoken and are closer to the coaches and the game. For the smooth play discipline is important. Discipline in sports is very important off the field as well, as how the player is to be hairy towards other faculty members, junior players as well as officials of the game. In the team sport discipline of the player plays much important role for the winning of team, listen-

ing to the captain, concentrating towards the game, as much more important motivating the young members as well. According to **Johny Lewis** (London), (bomber), said, "be 100% disciplined and you have a good chance of success. Without it you will never reach great height whether in business and sports." For the success of an individual or team Discipline is vital.

**Ron Barrassi**, Australian Footballer, once said about self-discipline amongst the team on field, "a lack of self-discipline can cost the team a game. In the end, it doesn't matter unless everyone in the team shows this quality of self-restraint."

In fact, discipline is the basic principle behind the progress and smooth working of an individual and a nation, essential for the preservation of social values. But most important about Discipline is that Discipline should be in-born and self-imposed rather than EXTERNALLY IMPOSED.

**Opportunities in Medical Stream**

Opting for a stream after tenth class for a bright future is like giving a desired shape to wet sand for making a pot. Taking medical stream from that very point demands a lot of hard work and patience. A lot of efforts have to be put down to be successful in medical stream. With advancing time, medical was the only option available from medical stream but now it offers a vast number of

career options. But all these options have one great thing in common and i.e. human welfare.

Being a doctor is considered as one of the most reputed jobs in the world, all over the world doctor is considered as second god to save human life. His calm and cool nature assures the patient that he is in safe hands and he recovers quickly.

As the time goes on, over medical services are getting better and better. For every minor and major health problems, the treatment is available. Diseases like cancer once considered in-

curable, are also cured nowadays. Our state and central government are trying their best to provide better health facilities to people. It is only due to progressive advancement in medical services that our country's death rate has lowered signifying a great social and economic life of the country.

I, by taking medical stream, have given a little shape to my earthen pot and I hope with blessings of the almighty and with my hard work I would be able to give a perfect shape to my earthen pot.

## "Removing the gender bias through Education" CT Group Launches Special Scheme "ARYANA" in Technical Education for Girls

Students at CT campus, Shahpur

Literacy in India is a key for socio-economic progress, and the Indian Literacy rate grew to 75.06% in 2011. But the level is well below the world average literacy rate 84%, and India currently has the largest illiterate population of any nation on earth. There is a wide gender disparity in the literacy rate in India: effective literacy rates 82.14% for men and 65.46% for women. The female literacy rate has had a dramatically negative impact on family planning and stabilization efforts in India.

Charity is the act of giving money, goods or time to the unfortunate, either directly or by means of a charitable trust or other worthy cause. Most forms of charity are concerned with providing food, water, clothing, and shelter, and tending the ill, but other actions may be performed as charity: visiting the imprisoned or the homebound, dowries for poor women, ransoming captives, educating orphans and girls.

Under the same umbrella of thought, CT Group un-

der the visionary leadership of its Chairman S. Charanjit Singh Channi, today launched a special scheme 'ARYANA' for girls in an effort to promote technical education and expertise amongst them.

CT Educational Society announced that any Girl, wishing to pursue Technical Education under CT Polytechnic College, after their secondary examinations would be given special fee waivers so that technical education is no longer a dream for them. Girls from State Boards, all over India, with 85% and above would qualify for 100% tuition fee waiver while greater than and equal to 80% for 50% tuition fee waiver and greater than equal to 75% for 25% tuition fee waiver scheme respectively. More Scholarships & Tuition fee waivers are available in all other courses, for more details visit [www.ctgroup.in](http://www.ctgroup.in) or call 99145-04904.

With this new scheme for girl education, it has taken another leap, towards fulfillment of social responsibility and proving itself as one of the

best education providers all over India. Chairman of CT Group of Institutions S. Charanjit Singh Channi announced that CT Group is forever dedicated towards the upliftment and benefit of the less privileged sections of

our society. He stressed upon the fact that CT Group has always been at the forefront, wherever the need of a support lender was felt. CT Educational Society has been organizing Marathons for Charity, Launching blood dona-

tion and tree plantation camps. It also has to its credit an establishment "ASHA" that provides food, clothing, toiletries, etc to the under privileged through its tie ups with leading hotel, palaces, etc.

IBM Academic Initiative

IBM.

The Great Mind Challenge

TGMC - 2011

Face 2 Face Evaluation Round

Venue: CT INSTITUTIONS Shahpur, Jalandhar

IBM's The Great Mind Challenge (TGMC) promotes engineering students from colleges across India in their attempt to develop solutions for real-time problems and scenarios using IBM open source software. It is aimed to encourage students who aspire to make key contributions to develop applications on cutting-edge IBM technologies while providing them with an opportunity to improve their software-writing skills. This innovative program was launched in 2004 that addresses the need to educate millions of students for a more competitive information technology (IT) workforce by partnering with colleges and universities.

TGMC has been listed as the largest technical competition of its kind, consecutively for the second year in a row in the Limca Book of Records— testimonial to the fact that there is a need in today's competitive world for such an initiative that supports, guides, and challenges students to higher goals. CT Group of Institutions has been awarded as one of the top 30 Colleges of India in the same competition for the year 2009 and 2010.

TGMC-2011 was started in July 2011 and CT group's overwhelming participation saw us crossing the 1000 registration mark within no time. 1248 students registered for TGMC 2011, comprising of 341 teams. Total no of SRS that were submit-

ted were 39 and total no of projects submitted were 30 out of which 5 projects made it to the second round.

For the states of Punjab and Uttrakhand, CT Group of Institutions, Jalandhar, was chosen as the nodal center for the second round of TGMC 2011 i.e., face-to-face (F2F) evaluation round on 28th July 2012. In this round all the shortlisted teams make a presentation of their projects and present it in front of the panel that comes from IBM to evaluate them.

The panel that visited CT Group of Institutions consisted of Mr. Mani Madhukar, Technical Lead, North and East India, IBM-Academic Initiative and Mr. Manoj Saradana from IBM Software Labs (ISL). The teams that participated in the event were from CT Institute of Technology Shahpur, CT Institute of Engineering Management and Technology Shahpur, Graphic Era University Dehradun, College of Engineering and Research Roorkee and Indo-Global College of Engineering, Chandigarh.

## “Earth is OURS: We all are concerned” CT GROUP OF INSTITUTIONS OBSERVED “NO PLASTIC DAY”

CTIANS giving the message "No Plastic"

CT Group of Institutions organized a day long function on 'No Plastic Day', the burning issue of the world at its Maqsudan Campus. A Complete Campaign was organized to find ways to mitigate the usage of plastic & use the other resources in lieu of plastic-made resources. In this campaign the teaching as well as non teaching faculty members were divided into fifteen teams. Teams prepared display models, working models, charts, slogans, bags,

dustbins, etc to present the theme. It focused on how, we can regulate our life without using plastic. A special debate was organized for negating the usage of plastic.

Speechifying on this occasion Dr.P.P. Singh Campus Director Maqsudan, said, "Plastic is responsible for causing pollution, killing wildlife and plastic is using the precious resources of the earth. While governments may be working out ways to lessen the ill-effects of plastic on the environment,

however, each of us should shoulder some of the responsibility for this problem, which ultimately harms us. For a clean and green environment, we should try to use alternatives to plastic whenever and wherever possible. We should Cut down on the use of plastic, and contribute to save our planet."

All the members of the teaching & non-teaching staff seemed agile & enthusiastic. Sensing it a nice idea to involve everyone in campaigning, the non teaching praised the management of CT Group & said that this campaign not only made them aware of the harmful effects of plastic, but also gave impetus to substitute plastic & plastic-made products. Now they have acquired knowledge in galore to guide others about the harmful ef-

The Judges glancing the models

fects of plastic. Sharing the views about this campaign Mr. Mohan Lal (Bakery Assistant) said that we can bring awareness among all by such campaigns. This is a good endeavor to spread awareness & inject the idea of the concern in the minds of people.

All the Winners were felicitated with awards. 1st prize was bagged by the team of Computer Lab Coordinators, followed by Management Department and 3rd prize was

won by Hotel Management team.

Appreciating the efforts of the faculty S. Charanjit Singh Channi, Chairman, CT Group of Institutions said, "Our Group aims at educating people about Environmental issues. The management & faculty members are trying their level best to inspire all towards this direction. Earlier we had organized Natural Conservation Day. This "No Plastic Day" is in the continuation of the same journey."

## CT Group continues the Journey of "ASHA"

Faculty of CT Group distributing the towels to the needy

CT Group of Institutions continues the journey of project ASHA (An initiative to stop the wastage, whereby, all the food which is consumable is being served to the slum areas and other

needy people) This project was initiated a month ago by the faculty & the students of CT GROUP, where they had a tie up with different hotels which provides them all the usable material (food,

household items or anything) which could be distributed amongst the people who live in the slum areas. Till today through project ASHA we have reached to more than 200 people of slum areas & have distributed them food, clothes, toiletries etc.

This time, project ASHA catered the needs of the children (with physical and mental disabilities) at Mother Teresa Orphanage in Guru Teg Bahadur Nagar, Jalandhar.

Faculty, staff &

students of CT Group, visited Mother Teresa's Missionaries of Charity (An orphanage for special children), as ray of hope to the underprivileged. They distributed towels (courtesy Hotel Maya) and clothes to the kids. In the orphanage, there were about 46 children of the age group of 3 to 18 years, who were taken care of by the nuns, in a very homely environment. CT Faculty also went to Apahaj Ashram and distributed towels, clothes (courtesy Hotel Maya

and CT Public School). The people who were staying in the ashram were very happy and contented to see this gesture of love, affection and care.

In the words of S. Charanjit Singh Channi, Chairman, CT Group, "We will continue to work and provide the society everything we can. We will and are calling the society, corporate to join hands for this noble cause of providing ASHA to those who need it"

To provide the country a steady stream of competent young men and women with necessary knowledge, skills, values and attitudes to occupy positions of management and administration in business, industry, public system and the government the course MBA has been specifically tailored. Today the boom of MBA has attracted the fledglings that are aspiring to explore the new vistas in career. MBA is a binal course getting currency in colleges, professional institutes universities etc. In this world where the fierce competition is going on, in the recent years the significance of MBA has rapidly increased. Due to this, the boom range

## MBA: Regular or Distance?

of modes of MBA has become the important facet of learning. Today there are two prominent modes for MBA i.e.; MBA regular & MBA distance. MBA regular is the most popular course in India and across the world in the field of management studies. It is such a mode of education in which the students get learning through regular classes by a following rigorous session & proper schedule. On the contrary MBA distance provides flexibility to the students by emancipating them to attend the regular classes. In this mode of learning the students just take the exams on the stipulated session. Let us have a through discussion to know which mode of learning is better. Distinctions between MBA regular & MBA distance- In modern age short cut methods are preferred. Be careful the shortcuts can be too fatal. So think hundred times before selecting

either of the two courses. The following discussion can be supportive in this connection.

1. Time creates the distinction: In MBA distance the students have the flying visits. They are not bound to attend the classes whereas the students in MBA regular attend the regular classes as it is the part of their curriculum. So they spend a good deal of time in learning.
2. Few chances of exposures for the students of MBA distance- The students of MBA distance are unaware of the culture which the students of MBA regular experience. In MBA regular the corporate & practical assignments, live projects, communicative atmosphere, extra-curricular activities, quiz competitions, debates, presentations, cultural activities are the chief activities that become the cutting-edge for this

cut throat competition.

3. Critical conceptual learning and tools that are relevant to achieve leadership, organizational objectives and goals, are only possible in MBA regular- The students of MBA regular can get ascertained about the profound facts, modern techniques, complex case studies which are considered all Greek to by the students of MBA distance.
4. Campus placements are in MBA regular only. The students of MBA regular have another advantage that is of campus placements. The companies visit the college & university campuses regularly & prefer the students of MBA regular. In MBA distance such opportunities are nowhere.
5. MBA regular is more recognized course than MBA distance- In the present scenario where the numbers of postgraduates, having MBA, are in-

creasing day by day, MBA regular is more recognized course than MBA distance. That is the reason in many states MBA distance is being abolished in various states of India. Recently J&K has abolished MBA distance.

6. MBA regular is a practical course whereas MBA distance is based on theoretical learning- In MBA regular practical education is being imparted through rigorous schedule whereas in MBA distance no such schedules are found. Education is totally being put on rote learning method. So in such a scenario MBA regular seems to be the right sort of education of management where you can unearth the challenges & hardships to ease the future & secure career. Only this can make "all the difference".

## Career opportunities in Hospitality, Travel & Tourism sectors Atithi Devo Bhavah (The guest is God)

Tourism is becoming a popular leisure activity throughout the globe. In 2011, there were over 983 million international tourist arrivals worldwide. For many countries, tourism is an important industry for employment generation and for earning vital foreign currencies. Millions of people worldwide, directly or indirectly associated with hospitality, travel & tourism service industries. In India, tourism industry is undergoing massive expansion and im-

provement. India is a country with diversifying natural resources and cultures, has a tremendous scope to cater tourism services to domestic and international travelers. According to Ministry of Tourism, Government of India, there were 3.72 lakh Foreign Tourist Arrivals (FTAs) during the month of May, 2012. The foreign exchange earnings (FEE) from tourism during the month of May 2012 were 5562 crore as compared to 5047 crore in May 2011 i.e. 10.2% higher. Tourism in India is the largest service industry, with a contribution of 6.23% to the national GDP and 8.78% of the total employment in the country. India attracts millions of tourists each year. To attempt to improve the number of tourists travelling in India, the Tourism Department of India

started Atithi Devo Bhavah campaign with the theme Incredible India. Bollywood actor Amir Khan is the brand ambassador of this campaign for the Ministry of Tourism. Work in the tourism industry is essentially concerned with providing services for people who are away from home on business or holiday. The purpose of travel can be leisure, pilgrimage, study, adventure, medical treatment or purely business. So, tourism service providers have to deal with different types of travelers and make arrangement according to their needs. Tourism is a very wide industry with multiple stakeholders. Job sectors in tourism include:

- Ministry of Tourism,
- Government tourism departments.

- Airport authorities (Immigration, custom services).
  - Airlines.
  - Railways.
  - Cruise lines.
  - Travel agencies.
  - Tour operators.
  - Health & Spa Resorts.
  - Hotel & restaurants.
  - Tourism research study, teaching.
  - Travel & tourism journalism.
  - Consultation.
  - Entrepreneurship, etc.
- Sky is the limit

for tourism professionals. The intensive role of Government to develop tourism infrastructure forecasts a bright future for this sector. Especially the young people, who choose to make a career in tourism, can rise to top position very quickly with a good returns and perks including an opportunity to meet people from all over the world.

Prof. Nabanita Sinha

Tourism CTIMIT

# British Parliamentary Debate @ CT

Faculty members at BPD session

Striving constantly to create learning atmosphere even for the

teachers, CT Group organized a five day session of the British Parli-

mentary Debate at its Maqsudan Campus. It was an interesting spell of learning in which around 70 faculty members from Maqsudan & Shahpur participated with enthusiasm. Performing the roles of Leader of Proposition, Deputy Proposition Leader, Proposition Whip, Leader of Opposition, Deputy Opposi-

tion Leader, Opposition Whip the faculty members touched various issues concerning societal, political, moral, logical, administrative, national, international, religious arenas etc.

Sharing the views the faculty members said that it was a great learning juncture where they got the prospect to exhibit the latent

potential.

Motivating the faculty members S.Charanjit Singh Channi, Chairman CT Group of Institutions said, "In this challenging scenario the teachers should fully geared up to meet the requirements of the hour. So we are providing the opportunities for this".

## Independence Day

The Independence Day of India is a moment of delight and grandeur but to achieve it the nation had to put up a long battle for over two centuries against the British Empire. Really we have lost much to gain INDEPENDENCE. As on 3rd June 1947, the last British Viceroy of India, Lord Mountbatten of Burma, declared the separation of the British Empire in India into India and Pakistan. The announcement was made under the terms of the Indian Independence Act 1947.

On the eve of India's independence, Pandit Jawaharlal Nehru's famous speech "Tryst with Destiny" marked the beginning of a free India with words symbolizing hope and

triumph.

When we got its independence from the clutches of British rule on 15th August 1947, it was this day when India's tricolor flag was unfurled by Pandit Nehru on the barricades of the Red Fort at Delhi. Each and every patriotic soul watched with excitement and paid tribute to thousands of martyrs who sacrificed their lives for India's freedom.

The significance of the Independence Day in the existence of a nation is of greater value. The day is much more than merely celebrating the anniversary of India's free statehood. On this day India attained a major part of Asian subcontinent's 562 extensively spread

territories besides British owned states.

15th August 1947 symbolizes the victory of Indian patriotism which the nation got after struggle from the repression of the British colonialism. The British, who oppressed India for centuries had primarily arrived to initiate business but steadily captured the entire government of the nation. They educated the Indians and in the process generated enthusiasts who weren't hesitant in helping them expanding their regime.

Men and women from all over India joined hands and fought for India's freedom. Many were acclaimed while others contribution went unnoticed. However,

praise wasn't what they desired for. It was the dream of free and autonomous India which motivated them to walk the path of struggle unselfishly. Neither did they battle for their region nor for their natives, but for India and Indians.

At the time of growing communal and caste conflicts, it becomes significant to remind us that the people who laid the foundation of free India has always dreamt of an integrated nation. Hence, it is our duty to live and sustain their dreams, the sole reason for which Independence Day in India is observed.

It is a day to pay a mark of respect to our saviors because of whom we are breathing

an air of freedom which does not have the elements of exploitation and repression. Now doubt today we are free but this freedom demands several commitments from our side. We need to preserve the spirit of Independence. We are to do our duties in the sincerest manner so as to respect the abstract as well as concrete ideas of those who have brought Independence for us. Real independence lies not only in self rule, but in being able to churn the opportunity to create a nation which is not injured by the shackles of casteism, religious intolerance and lack of education.
